INTRODUCTION

The Northern New Mexico College (NNMC) Enrollment Report is an analysis of the End-of-term **student enrollment data**. This document is compiled by the Office of Institutional Research in order to inform Academic Department Chairs primarily regarding the current semester student enrollment and course loads. It is intended for both planning and strategic decision-making. This report is prepared after the end of each semester and focuses on the first 8-week, second 8-week, and 16-week enrollments. Three additional tables are added this year to the report. The “**Enrollment by High School (Dual Credit Students)**” table contains dual credit students’ enrollment from different high schools; the “**Course Division (Lower or Upper) VS Faculty Type**” contains lower and upper division courses taught by full-time and adjunct faculty; and the “**Students Enrollment by Campus Location**” contain student’s enrollment at different locations from NNMC. A new graph named “**Students Enrollment by Distance (miles) Traveled to Campus**”, is also added to provide the enrollment of students by distance they traveled to the campus.

In the departmental tables, HPER (Health, Physical Education, and Recreation) is not an academic department but the courses are disaggregated to analyze these courses separately from the Academic Departments.

The data in this publication is compiled using the most recent enrollment files, course schedules, and faculty assignments data. All data is collected and maintained using Banner. The intent of this report is to provide an accurate and consistent reference for use by various internal and external stakeholders as well. This effort intends to provide quick and easy access to institutional data and open up new ideas and questions. If you have any questions or comments regarding this report, please feel free to contact us by email at rishi.poudyal@nnmc.edu .
